Sir/Madam,

As you are all aware that AICTE has taken several strides for improving quality of technical education in the country. The various reforms in the technical education system include the model curriculum of AICTE which has a mandatory induction program for the first-year students. The induction program helps the student to adjust and adopt to the new environment of a college and has an integrated component on human values. Many quality initiatives implemented by AICTE aid in an overall holistic development of the education system and the country.
